

Screen touchspace

APEK TOUCHSPACE

Versatility, technology and interaction with the touch of your hand

The new Touchspace™ 2011 is the first Apek terminal to offer total interaction among the senses: vision, touch and audition.

Through the multi-touch 32" screen and the HD camera, the new Apek Touchspace™ 2011 allows the development of various applications such as video conferences, facial biometry and enlarged reality.
